2.4 GHz

Only
2.4 GHz

- NOTES:
1. Connections to LAN ports on any given router are interchangeable with other LAN ports on the same router.
 2. All WiFi Routers have their DHCP off except for the one acting as the gateway (Airtel ZTE MF29). Gateway's WiFi is off.
 3. All three apartments have a line interactive AC inverter acting as backup. Besides the inverter, A703 has two Intex Protector 725 UPSes - one for the NAS, other for the Gateway, Switch and WiFi Router. These UPS resist the transient caused while switching from mains AC to inverter during mains failure.
